

POS Count Differential Year-Over-Year

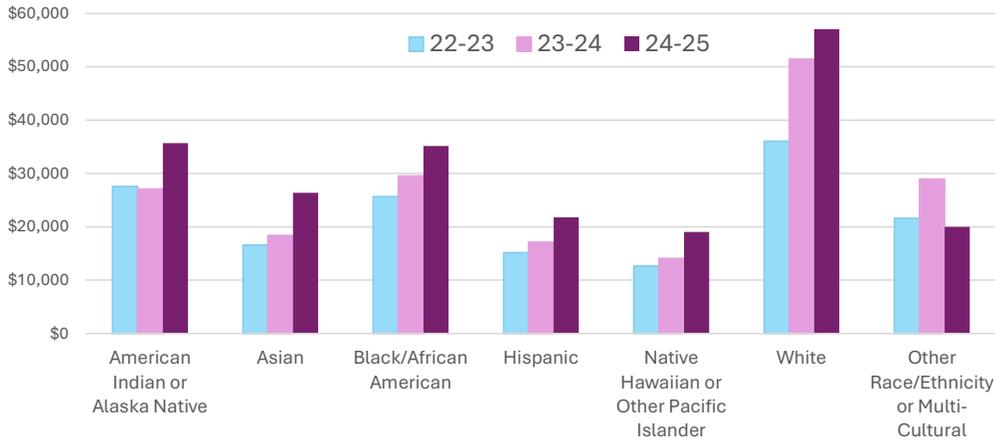

Percentage of POS Count by Residence Type & Ethnicity

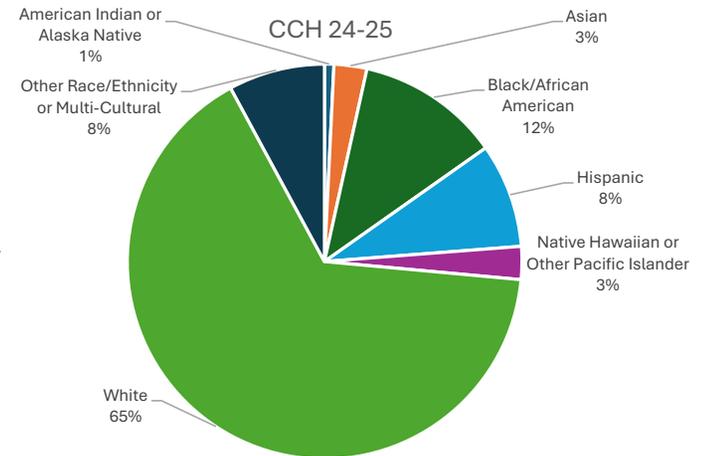

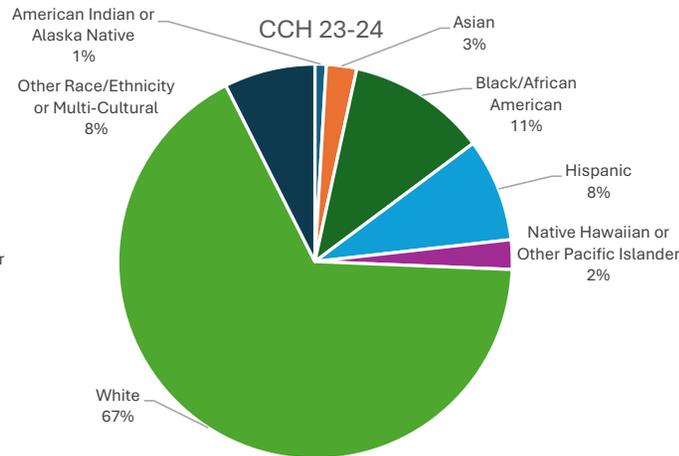

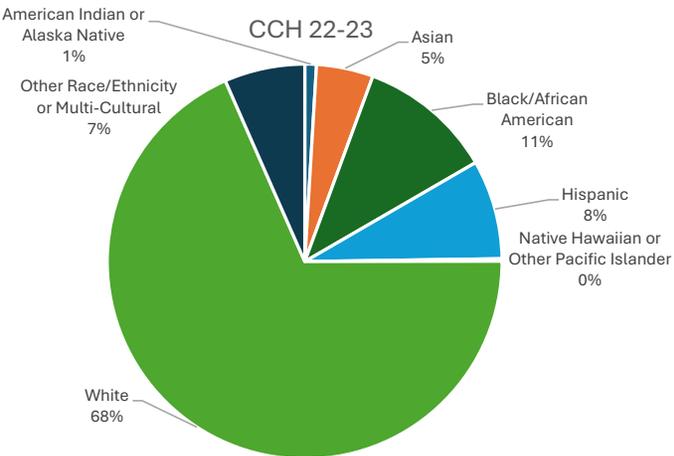

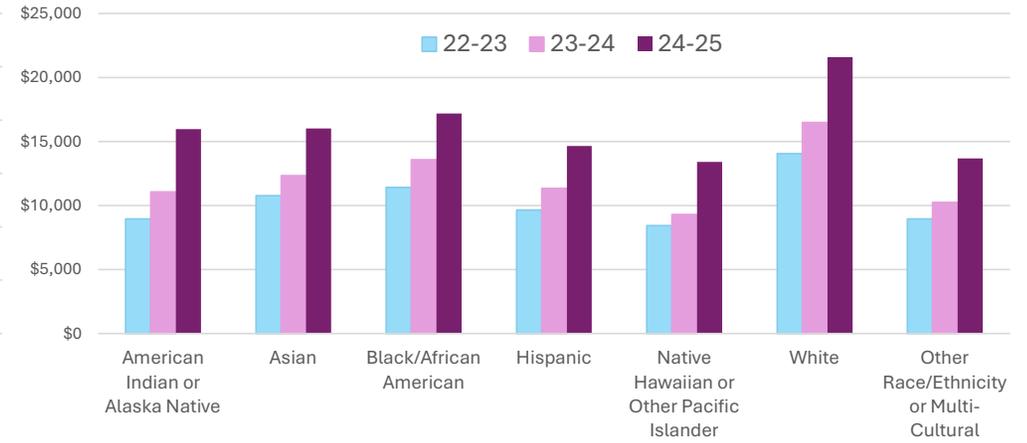

Raw data provided by DDS and pulled from ACRC data analysis. Top 4 ethnic subgroups as represented by DDS data represented in data visualization.

Per Capita Authorized Expenditures Year-over-Year

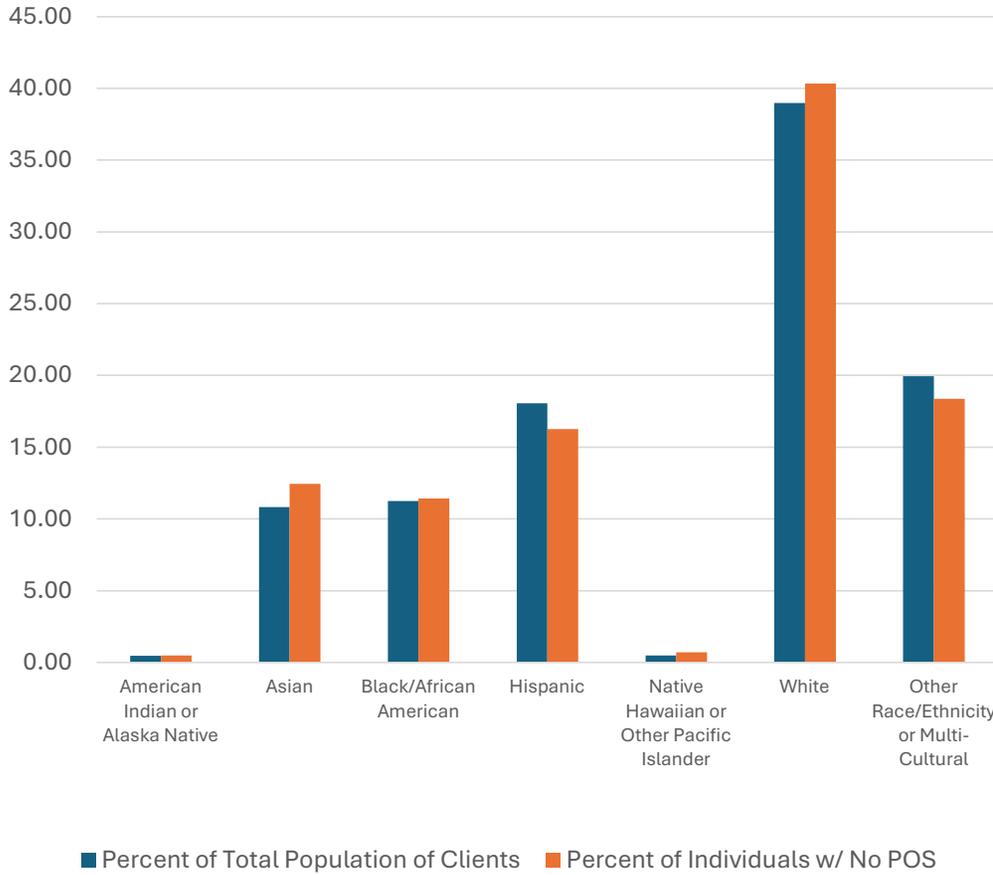

Client Family-Home Only
Per Capita Authorized Expenditures Year-over-Year

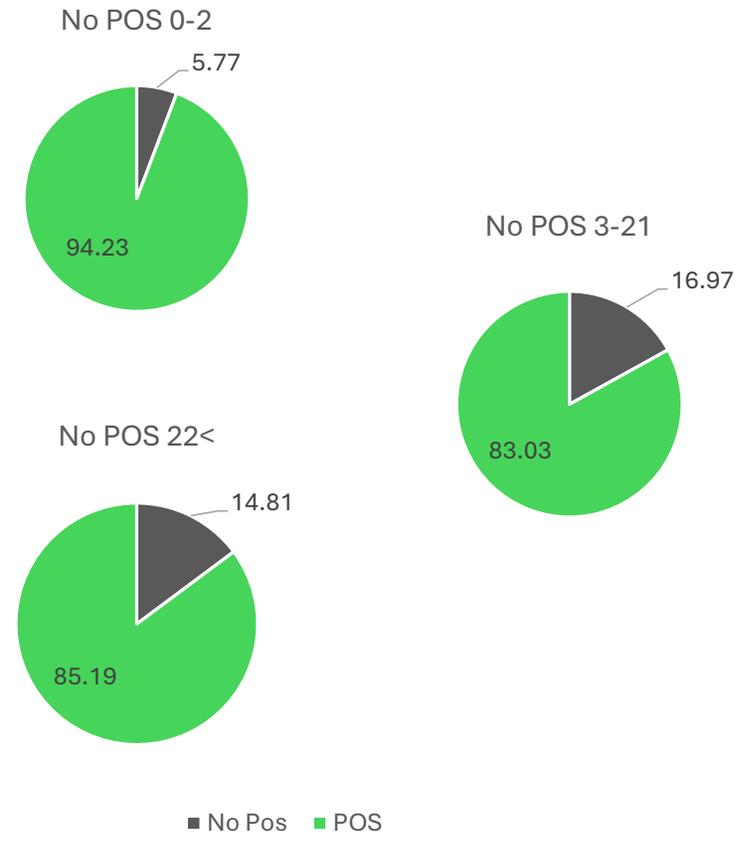

Clients w/ No POS

By Ethnicity

By Age Group

Raw data provided by DDS. Percentages reflect A) Percentage of all client population by DDS defined ethnicity vs. B) percentage of client population receiving no POS by sub-population.

IPP Translation

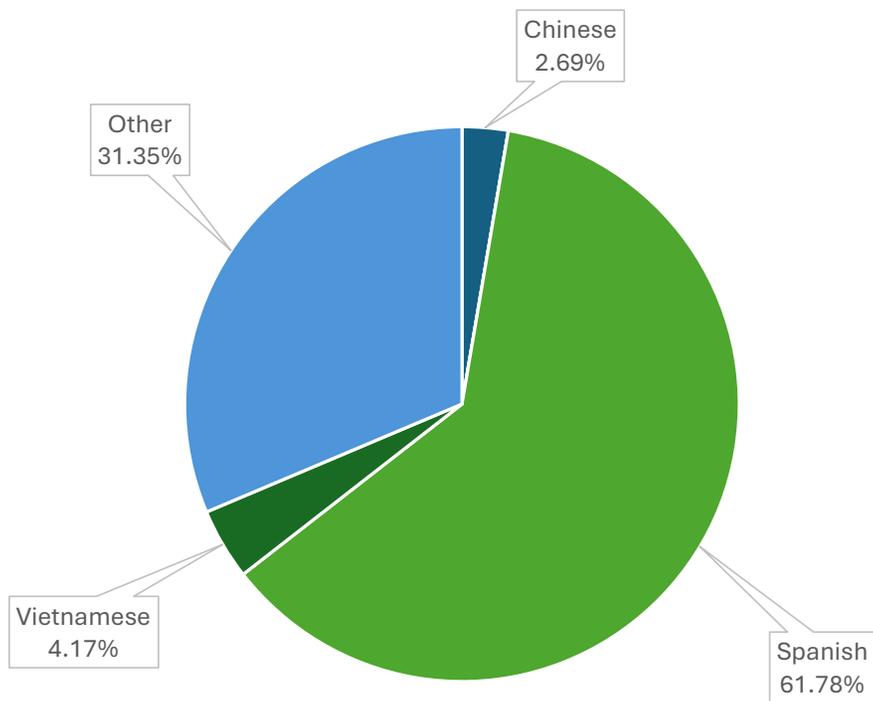

- Note: DDS records/reports on number of requests from families for IPP translation.
- Per agency best practice, ACRC proactively translates the IPP into the preferred written language of the family/client, as such no requests for translation is required or recorded. Thus, the DDS reported number for requested translations for ACRC is 0.

Key Statistics (FY 24-25)		Previous Year
IPPs Translated 2024	920	203
Average Days to Complete Translation	13.5 Days	42.6 Days
Median values of Days to Complete Translation	7 Days	40 Days
Standard Deviation	8.96 Days	22.82 Days

Note: The average number of days means that if you add up all the days it took to translate each report and then divide by the number of reports, you get 13.5 days. The median number of days is the middle value when all the days are listed in order, showing that half the reports took less than 7 days and half took more. The standard deviation (8.96) tells us how spread out the days are from the average, with a higher number meaning more variation.

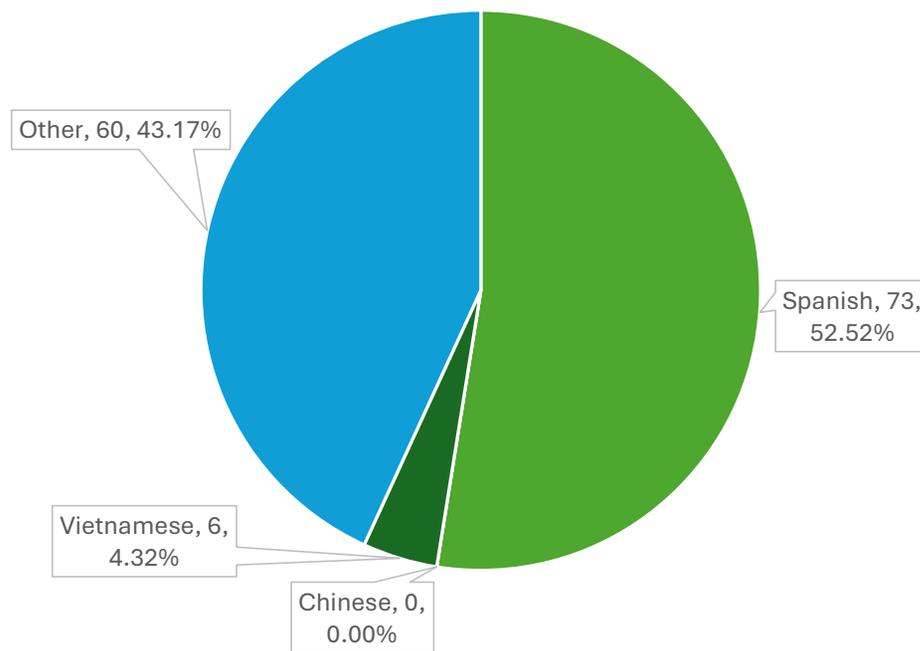

Client Languages vs. Staff 2nd Languages

Languages Other than English

- Clients Lang. other than English= 11.25%

Staff 2nd Languages Simplified

- ACRC Bilingual Staff = 25.05%

Language groupings done in accordance with DDS directives.
