1 NCI CA average in blue is significantly above the NCI national average; NCI CA Average in orange is significantly below the NCI national average; NCI CA average in black is either within the weighted NCI national average or a question that was not tested for significance.																									
NCI CA Average percentage was compared to the weighted NCI national average, and the differences between the two were tested for both statistical significance as well as effect sizes. Effect sizes are used in addition to statistical significance because statistical significance of a state's result depends in part on the size of the state's sample—the larger the sample, the more likely it is that even a small difference will be found statistically significant. A statistically significant difference for a state with a large sample size, in and by itself, does not necessarily mean there is a practically significant difference. State percentages are categorized into three classes: 1) Significantly above the NCI average; 2) Within the NCI average range; 3) Significantly below the NCI average.																									
2 Data not provided represents data that was not calculated for the FY 19/20, as only the positive response options were shown and/or data was collapsed																									
3 Not on FY 19/20 represents response options and/or questions that were not included on the FGS FY 19/20 survey tool
