

## Welcome to Early Start!

**We want to keep your family healthy while promoting your child's development during the COVID -19 public health emergency.**

**ACRC is offering early intervention services remotely using a phone, tablet or computer!**

### **DID YOU KNOW....?**

Remote therapies are:

- Ideal for families wanting to learn quick and easy ways to improve their child's skills throughout their daily activities.
- Individualized. Together, you and the early intervention provider will develop strategies to target your child's skills in the areas that matter most to you.
- Convenient. Available using a phone, tablet, i-pad or computer via an online platform.
- Young children (0-3) learn best in their natural environment with people they are comfortable with. Research shows that embedding a variety of learning opportunities throughout a child's daily activities leads to large gains in a child's development.

### **HOW DOES IT WORK...?**

- We use a *family-centered coaching model* focusing on engaging parents and caregivers while they are interacting with their child in everyday activities and routines.
- Sessions are interactive and dynamic. Your child *does not* need to be seated in front of a screen.
- You decide which on-line device might work best for you and your family.
- Your Early Start service coordinator will assist by guiding you through the process.
