

Service Policy Manual

Residential Services

Alta California Regional Center (ACRC) purchases residential services for individuals requiring care and supervision in a licensed setting.

ACRC will provide all appropriate services and supports in order for children to live in their family home. ACRC will fund residential services for minor children when circumstances indicate the need for such service.

Consumers receiving residential services shall use all public benefits available for maintenance and support in the residential setting (i.e., SSI, SSA, MediCal, etc.).

When developing and recommending residential service choices, ACRC shall give preference to those settings offering:

- individual bedrooms
- single story residences
- services to not more than four consumers
- services based upon geographic and level of service needs

The ACRC Executive Director may review and authorize an exception(s) if warranted by individual circumstances.
